

SWISS COLOR MICROBLADING PIGMENTS – COLOUR DESCRIPTION

MB 801	Skin	<p>Skin is a finely tuned, golden Camouflage color. Mixed with a brown color, the brown gets brighter and softer. Skin is used as a highlighter between too strong and dark eyebrow hair to loosen the look. Due to the high white pigment content, we do not recommend to use Skin as a general mix color for eyebrows.</p>
MB 802	Flamingo	<p>Flamingo is an orange / yellow correction color for brightening dark MB pigments. Mixed with a brown tone color it is mainly used for the correction of blue or green eyebrows used. Cooler MB results can be warmed with Flamingo. Too deep pigmented spots can be corrected individually with Flamingo.</p>
MB 803	Oive	<p>Olive is used pure for light hair types, but mostly as a correcting color for reddish eyebrows together with a shade of brown color coordinated to the skin type.</p>
MB 804	Maple	<p>Maple is the most natural color for light blonde hair types, as well as for all bright and rather reddish skin types. Used pure a fine blond brown is obtained. The color can be mixed and matched with all brown tones. Combined with a bit of Flamingo Maple gets even warmer and golden.</p>
MB 805	Brazil	<p>Brazil is suitable for all light brown to medium brown hair types. Suitable for all skin types. The result is a very nice delicate medium to dark brown. Mixed with Flamingo the result is a warm hazel.</p>
MB 806	Walnut	<p>Walnut can be used pure or mixed. With Maple lighter or with Coconut darker mixed, it is a good starting shade for darker skin types with medium to dark hair. Pure the color yields a rich chocolate brown finish. For cool skin undertones we recommend to add a little Flamingo to support the warm pigments.</p>
MB 807	Ebony	<p>Ebony is a slightly ashy, olive brown tone and suitable for all dark skin and hair types. The result is a cooler brown. The combination with Flamingo for a warmer rich dark brown is perfect.</p>
MB 808	Coconut	<p>Coconut is the darkest shade of brown. This beautiful brown black fits all southern, very dark skin and hair types. They can be used pure or with a touch warmer matched Flamingo. Coconut is kept in the skin very fast through the ashy amount, the result is quickly visible.</p>
